TECHNOLOGIES

Utilizing the next generation of electrical technology, we can detect the angle of the head to calculate how many turns the anvil has rotated. For Digital Torque products this is accurate to 1%.

TOOL FEATURES

Built-in angle function with accuracy $\pm 2\%$ with 1 degree ° increments.

The LED flashing feature on this power tool signals important alerts and warnings, enhancing safety and efficiency during operation.

Required AA Batteries

Our buzzer serves as an audible alert to notify the user of specific conditions or errors during operation, enhancing safety and efficiency

Vibration feedback to the user once 90% of the target torque is reached.
